Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 59-66 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amended claims are directed to a sample volume of about 0.1 to 2.0 microliters which is not supported by the original specification. The original specification teaches on page 9 a sample volume of 0.1-0.5 microliters.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 59-62 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 59 is incomplete. It does not end with a "period" and seems to end in mid phrase. Additionally, the last two lines are not clear and could be clarified by stating – sample volume – instead of the claimed "sample".

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 59-66 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Pugh.

See the appropriate paragraphs of the 6/26/03 non-final Office action.

In light of the above 35 USC 112 issues, the limitations directed to the claimed volume range of 0.1-2 microliters have not been considered as these limitations are directed to new matter. The Office has interpreted the claimed invention as a fiber optic sensor with a reagent pad and the appropriate detection/analysis means.

See the appropriate paragraphs of the 6/26/03 non-final Office action for the teachings of Pugh.

Response to Arguments

Applicant's arguments filed 5/10/06 have been fully considered but they are not persuasive.

Applicant state the above amendments teach a sample volume range of 0.1-2.0 microliters that is not taught by Pugh. The Office has considered these limitations and believes they constitute new matter and are rejected under 35 USC 112 first paragraph.

Applicants' also state the device of Pugh would not be able to accurately measure sample sizes contemplated by the instant invention. Even if Applicants' were to claim a volume range within the scope of the original disclosure, such as 0.1-0.5 microliters, the Office would need factual corroboration of the inability of Pugh to

Art Unit: 1743

perform using the claimed volumes. A proper and timely filed 1/132 Declaration that is within the scope of the claimed subject matter may provide corroboration.

The 35 USC 103 rejections have been vacated because the volume limitations in the amended claims are not supported by the original disclosure and have not been considered further beyond the 35 USC 112 first paragraph rejections.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
